

# TFT Board 4 Capacitive With Bezel

PID: MIKROE-3979

TFT Board 4 Capacitive is a 4.3" display board which features the standardized 2x20-pin display connector. The display board also integrates a capacitive multitouch panel with swipe and zoom gesture support.

The TFT display module supports up to 24-bit pixel format (RGB: 888), allowing a true-color palette of 16,7 million colors, and resolution of 480 x 272 pixels. It features an excellent contrast ratio and uniform brightness. TFT Board 4 Capacitive, along with other displays from the TFT Board Capacitive line of products, is supported by [VisualTFT](#), a software tool for simplified development of visually oriented embedded applications.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.  
ISO 14001: 2015 certification of environmental management system.  
OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).

## Specifications

Display size	4.3"
Resolution	480x272px
Graphic controller	SSD1963
Touch Screen	Capacitive
Active area (mm)	95.04 x 53.86
