HIRSCHMANN MOBILITY

Antennas for Telematics / M2M / IoT Applications

TE Connectivity's HIRSCHMANN MOBILITY products, formerly Hirschmann Car Communication, provide some of the world leading antenna, telematics and infotainment technologies for automobile and commercial vehicles communication and connectivity as well as the broader transportation market.

This catalogue contains products from the standard range in the following four business areas:

M2M (Machine-to-Machine)/ IoT (Internet of Things) Communication & Telematics

From antennas to complete systems as container and trailer tracking

Commercial and Off-road Vehicles

Antennas and products/accessories for trucks and off-road applications

Infotainment

Radio Tuner Cards for analog and digital reception (AM/FM/DAB/HD/SDARS)
for EU/Japan/US markets

Automotive Aftermarket

Broadcast antennas

To receive more information on these or our other products, please visit us at
www.te.com/hirschmann-mobility or contact us via email hirschmann-mobility@te.com

This catalogue contains products from our European and US portfolio. All products are available worldwide. For more information please contact us via email:

Alternative cable and connector configurations on request.

The information/details in this publication merely contain general descriptions or performance factors which, when applied in an actual situation, do not always correspond with the described form, and may be amended by way of the further development of products.

The desired performance factors shall only be deemed binding if these are expressly agreed on conclusion of the contract.
