M28876 Connector Series

Amphenol Fiber Systems International (AFSI) is a leading producer and supplier of M28876 connectors to the US Navy and allied navies around the world. Our stringently toleranced and precision machined connectors, manufactured at our state-of-the-art, ISO 9001:2000 certified factory in Allen, Texas, U.S.A., are designed to provide superior optical performance in the harshest of environments.

Features & Benefits

- Qualified to MIL-PRF-28876 specifications
- Low insertion loss (-0.35dB typ MM, -0.35dB typ SM)
- Compatible with single mode or multimode termini
- Full environmental sealing
- Available in 3 shell sizes
 - ◆ Shell 13 – 4 channels
 - ◆ Shell 15 – 6 channels or 8 channels
 - ◆ Shell 23 – 18 channels or 31 channels
- Available in 6 keying options (1 through 6)
- Backshells, featuring AFSI's exclusive Quickloc cable captivation system, available in straight, 45 degree and 90 degree versions
- Hybrid (COTS only) versions available
- Fully field maintainable in accordance with MIL-STD-2042

Quickloc Backshells

Our exclusive Quickloc cable captivation system can be quickly installed on virtually any military or tactical cable. Quickloc allows individual termini to be serviced, repositioned or cleaned without complete backshell disassembly. Additionally, all Quickloc components are reusable, so cable repairs are speedy and cost-effective. Quickloc is standard on all AFSI M28876 backshells.

Cable Assemblies

Amphenol Fiber Systems International (AFSI) is one of the world's leading manufacturers of harsh environment fiber optic connectors that are rugged, reliable and cost-effective. Among our valued customers are virtually every major defense company in the United States, the U.S. Army and Navy and many international defense organizations.

All AFSI cable assemblies are manufactured by expert technicians in our state-of-the-art, ISO 9001:2000 certified facility. This ensures that our processes and practices are optimized for the unique requirements of fiber optic cable assemblies rather than one-size-fits-all electrical assemblies.

Our goal is to exceed customer requirements with every cable assembly. AFSI is able to assist in designing and building custom cable assemblies or building to a customer print. Our technicians are trained to MIL-STD-2042B and a variety of other procedures critical to manufacturing harsh environment fiber optic cable assemblies. An optical test report is included with every cable built. If other tests are required, AFSI is capable of testing either in-house or contracting with one of our test laboratory partners.

MIL-PRF-28876 Product Specifications

Specification	Measurement/Detail
Mating Durability	500 cycles per EIA/TIA-455-21
Vibration	EIA/TIA-455-11, Test Condition II & VII, 30 minutes / Axis
Mechanical Shock	MIL-STD-901, Grade A, Class I
Thermal Shock	-40°C to +70°C, EIA/TIA-455-11, Test Condition II & VII, 30 minutes / Axis
Thermal Cycling	-5°C to +25°C, 5 cycles per EIA/TIA-455-3
Corrosion Resistance	500 hour salt spray per EIA/TIA-455-16, Test Condition I
Ozone Exposure	150 ppm for 2 hours per EIA/TIA-455-189
Humidity	240 hours @ 98% RH per EIA/TIA-455-5, Method B
Fluid Immersion	EIA/TIA-455-12
Crush Resistance	7 tests @ 1250 Newtons per EIA/TIA-455-26
Maintenance Aging	Terminus insertion and removal, 10 times
Terminus Retention Force	22 lbs for 5 seconds
Insert Retention Axial	100 psi torque for 1 minute
Cable Pull Out Force	162 lbs for 10 minutes per EIA/TIA-455-6
Cable Sealing Flexing	200 cycles at 180° flex per EIA/TIA-455-1
Impact	8 drops @ 7 feet rotated each time per EIA/TIA-455-2, Method B
Flammability	0.75 inch flame for 10 seconds mated, 1.5 inch flame for 60 seconds unmated per EIA/TIA-364-81
Operating Temperature	-28°C to +65°C
Storage Temperature	-40°C to +70°C
Insertion Loss (Multimode)	-0.35 dB typ (62.5/125)
Insertion Loss (Single Mode)	-0.35 dB typ (9/125)
Back Reflection (Single Mode)	-50 dB typ
Connector Insert	Aluminum Alloy, Anodized
Connector & Backshells	Aluminum Alloy, CAD Plate
Cable Sealing, Strain Relief	Polyolefin, Self-Encapsulating

Other Shipboard Products

M29504 /14 & /15 Termini

Features & Benefits

- Pre-radius zirconia ferrule tip provides optimal insertion loss performance
- Laser marked TICC codes eliminate the need to decipher complex color code bands
- Precision ferrule alignment with captivated split zirconia sleeves
- Wide configuration selection
- Superior optical performance
- Custom sizes available (Commercial-off-the-Shelf only)
- Integrated environmental seal on each terminus
- Precision “press fit” terminus design
- Each terminus individually packaged and labeled for ease of identification, storage and use

Applications

- US Navy shipboard, surface and submarine, mission critical combat and communication systems
- Mobile tactical shelters and electronic battlefield networks

Materials

- Ferrule: zirconia ceramic
- Terminus body: stainless steel, passivated
- Retention clip: beryllium copper
- Alignment sleeve: ceramic
- Alignment sleeve hood: beryllium copper
- O-ring seal: fluorosilicone

Military Grade ST Connectors (MIL-C-83522)

Features & Benefits

- Stainless steel body with zirconia ceramic ferrule and fungus-resistant self-extinguishing boot
- Superior optical performance in extreme environmental conditions
- Mil-qualified series: high spring force for shock and vibration resistant critical in military applications
- Navy approved COTS series: for moderate shock and vibration environments
- RoHS compliant

Applications

- US Navy shipboard, surface and submarine, mission critical combat and communications systems
- Mobile tactical shelters
- Electronic battlefield networks
- Deployable outdoor, harsh environment

Materials

- Ferrule: zirconia
- Body: stainless steel
- Boot: fungus resistant, self-extinguishing thermoplastic

FS12 Pierside

Features & Benefits

- Hermaphroditic design
- Rugged design handles the rigors of deployment and harsh environment conditions
- Environmentally sealed connector
- Military qualified MIL-PRF-29504 /14 & /15 termini
- Removable insert cap
- Captive insert cap screw
- Sealed termini keep the optical path clear
- Field repairable using existing parts

Applications

- Umbilical cables used to interface between shore and ship networks
- U.S. Army, Navy, Air Force and Marine Corps tactical and strategic deployments
- Oil, gas and geoscience industries
- Industrial
- Broadcast

Materials

- Aluminum
- Other materials available

Finish

- Grey anodize
- Olive cadmium
- Other finishes available

Optron

Features & Benefits

- Designed IAW MIL-PRF-28876
- Available in 3 shell sizes: 13 (4 ch), 15 (6, 8 ch), 23 (18, 31 ch)
- Inserts are interchangeable from plug to receptacle. Either can be operated with pins or socket termini
- Operates with all qualified single mode or multimode M29504/14 and /15 termini
- Complete line of straight, 45 degree and 90 degree backshells

Applications

- Shipboard/Pierside
- Land tactical
- Mining
- Oil, gas and geoscience industries
- Industrial
- Broadcast

Materials

- Aluminum
- Stainless steel
- Brass
- Other materials available

Finish

- Black anodize
- Other finishes available

Termination Kits, Tools, MQJs & Training

Termination Kits & Tools

Amphenol Fiber Systems International (AFSI) offers kits for terminating most optical connectors in several markets today. These termination kits include: M28876; MIL-ST; M28876/MIL-ST combination; TFOCA and TFOCA-II®. AFSI also offers customized kits. Additionally, we sell cleaning and consumable kits and individual tools to replace broken or misplaced tools.

Measurement Test Cables (MTC)

This product series is designed to meet the highest industry and military standards for testing optical components. These products allow technicians to test and certify their work to the most exacting standards. Our unique fabrication and certification process ensures that only the highest quality, low loss and tight tolerance components are “Certified.” MTC product line includes TFOCA, TFOCA II®, TFOCA-III® and our MIL-STD-2042B “MQJ.”

Measurement Quality Jumpers (MQJs)

Measurement Quality Jumpers (MQJs) are used to assess the performance parameters of standard fiber optic cables. MQJs, which are considered calibrated test equipment, are used as reference standards for fiber optic cables and components. AFSI's MQJs are built to the highest quality standards with the industry's most stringent end face geometry and high-precision polishing requirements. Each MQJ is subjected to extensive testing and verification in AFSI's in-house test facility prior to shipment to customers. AFSI's MQJs are manufactured and assembled in-house with our fully qualified M28876, M83522 and M29504 connectors and

termini.

MIL-STD-2042B Training

AFSI's MIL-STD-2042B based shipboard training course is designed for persons involved in the installation, testing, troubleshooting or maintenance of shipboard fiber optic interconnect systems. Focusing on the M28876 and M83522, EIA/TIA 604-3 (SC) connectors, this class is ideal for all those responsible for the maintenance and installation of shipboard fiber optic networks and is a must-attend course for those who must follow the practices, procedures and specifications as outlined in the MIL-STD-2042B.

Successful completion of the five-day course and test qualifies the student to receive a certification from AFSI on the M28876 connector.

We are also certified by the Electronics Technicians Associations (ETA) to offer the Fiber Optics Installer (FOI) and the Fiber Optics Technician (FOT) certifications for an additional cost.

About Amphenol

Amphenol Corporation is one of the world's leading producers of electronic and fiber optic connectors, cable and interconnect systems. Amphenol products are engineered and manufactured in the Americas, Europe and Asia and sold by a worldwide sales and marketing organization. The primary end markets for the company's products are communication systems for the converging technologies of voice, video and data communications, industrial, automotive, military and aerospace applications.

About AFSI

Amphenol Fiber Systems International (AFSI) designs, manufactures, markets and supports reliable and innovative fiber optic interconnect solutions that withstand the harsh environments of military, oil & gas, mining and broadcast applications. After more than a decade in business, AFSI continues to uphold its position as a global leader in fiber optic interconnect components and systems such as M28876, MIL-ST, TFOCA and the TFOCA-II® connector, which AFSI developed and patented. Altogether, AFSI has delivered millions of fiber optic connectors in more than 22 countries. Whenever there is a need for superior cost-effective fiber optic systems and products that will stand up to demanding operating environments, you can rely on AFSI for engineering know-how, top-quality products and expert technical support.
